TECTONOPHYSICS

Contents Volume 261

Special Issue: Seismic Source Parameters: From Microearthquakes to Large Events
(edited by C.I. Trifu)

Preface vii
The magnitude–frequency distribution of earthquakes recorded with deep seismometers at Cajon Pass, southern California
R.E. Abercrombie 1
A method for multidimensional analysis of earthquake frequency–magnitude distribution with an application to the Vrancea region of Romania
C.-I. Trifu and V.I. Shumila 9
A new local magnitude scale for the Finnish seismic network
M. Uski and A. Tuppurainen. 23
Source characteristics of the Sinaia (Romania) sequence of May–June 1993
D. Enescu, E. Popescu and M. Radulian. 39
Seismic source parameters for microearthquakes of the Granada basin (southern Spain)
J.M. García-García, F. Vidal, M.D. Romacho, J.M. Martín-Marfil, A. Posadas and F. Luz'on 51
Scaling of source parameters for Vrancea (Romania) intermediate depth earthquakes
M. Radulian and M. Popa 67
Observational constraints on earthquake source scaling: understanding the limits in resolution
S.E. Hough 83
Relationships between earthquake magnitude, source geometry and slip mechanism
A.V. Vakov. 97
A method to determine microearthquake focal mechanisms in the presence of seismic anisotropy
A. Karnassopoulou, R.G. Pearce and D.C. Booth 115
The seismicity of Mt. Vesuvius
G. Vilardo, G. De Natale, G. Milano and U. Coppa 127
The 1985/86 Western Bohemia earthquakes: Modelling source parameters with synthetic seismograms
G. Bock, G. Grünthal and K. Wylegalla. 139
Complete moment tensor retrieval for weak events: application to orogenic and volcanic areas
P. Campus, P. Suhadolc, G.F. Panza and J. Sileny 147
Realistic inversions to obtain gross properties of the earthquake faulting process
S. Das, P. Suhadolc and B.V. Kostrov. 165
Possible mechanisms of dynamic nucleation and arresting of shallow earthquake faulting
Y. Umeda, T. Yamashita, T. Tada and N. Kame 179
Fracture coalescence as a mechanism for earthquakes: observations based on mining induced microseismicity
C.-I. Trifu and T.I. Urbancic. 193
Properties of the seismic nucleation phase
G.C. Beroza and W.L. Ellsworth 209

Research Papers
Experimental stress remagnetization of magnetite
G.J. Borradaile 229
Detection of the subducting crust of oceanic plates beneath the Kanto district, Japan
S. Ohmi and N. Hurukawa. 249

Late Cenozoic tectonics and paleomagnetism of North Cauca Basin intrusions, Colombian Andes: Dual rotation modes
W.D. MacDonald, J.J. Estrada, G.M. Sierra and H. Gonzalez 277
Scaling relationships in intraplate fracture systems related to Red Sea rifting
C. Castaing, M.A. Halawani, F. Gervais, J.P. Chilès, A. Genter, B. Bourgine, G. Ouillon, J.M. Brosse, P. Martin, A. Genna and D. Janjou 291
Diffusion creep in the upper mantle: an example from the Tanlu Fault, northeastern China
J.V. Ross, J.-C.C. Mercier and Y. Xu 315
Variscan dextral transpression in the French Pyrenees: new data from the Pic des Trois-Seigneurs granodiorite and its country rocks
D. Leblanc, G. Gleizes, L. Roux and J.L. Bouchez 331

Erratum
Correction to "Constraints on present-day plate motions south of 30°S from satellite altimetry" by Spitzak and DeMets [1996]
S. Spitzak and C. DeMets 347
